

Split-Pin Tiger by Paddy Leung

Beginner Level (6-99 years old) - For those who are not comfortable with drawing and painting this artistic method is suitable for all levels!

Materials

- Template: Split-Pin Tiger
- Drawing Materials
(crayons, pencil crayons, markers, etc.)
- Scissors
- Glue stick
- Black bristol board (size: 8.5"x11")
- 1 Pushpin
- 2-5 Split pins (size: 1/2")

Split-Pin Tiger by Paddy Leung

Beginner Level (6-99 years old)

Activity Duration: 10-20 minutes

Instructions

1. Choose your drawing materials and begin to outline the tiger stripes pattern, eyes, nose and whiskers. Don't be afraid to exaggerate the lines and make your tiger fierce and powerful!
2. Begin to colour your tiger once you have the outline design completed.
3. Cut out the template and begin to paste the tiger body parts on the black bristol board to have more support. Remember to apply pressure when you glue down the tiger, make sure the template isn't curling or else it won't stick!
4. Begin to cut out the tiger template pasted on the black bristol board
5. Take your push pins and poke holes in the tiger marked joints
6. Collect your split pins for all your joints and start putting the tiger together.
7. Ta-da! You did it!

Note: Children under six years old will need assistance with cutting the tiger templates, poking holes and using the split pins to put the tiger together.

Symmetry Tiger Printing by Paddy Leung

Advanced Level (10-99 years old) - For those comfortable with exploring a combination of drawing and painting and paper-cut techniques these approaches are suitable for you.

Materials

- Picture of a tiger face
- 1-3 Construction Paper (size: 8.5"x11")
- Pencil & Eraser
- Paintbrushes
- Tempera/craft paint (orange, black, white and red)
- Paint palette (ex. paper plate)
- Water container
- Rag cloth
- Hairdryer (optional)

Symmetry Tiger Printing by Paddy Leung

Advanced Level (10-99 years old)

Activity Duration: 15-35 minutes

Instructions

1. Fold your paper in half.
2. Draw half of an outline of your tiger face. You can use your tiger reference image to help you get some inspiration. Don't be afraid to exaggerate the lines, facial expressions to make your tiger fierce and powerful!
3. Once you have your outline design completed, you can begin applying paints on your lines. Take your paintbrushes and outline details of the tiger face. Start with the eyes, nose, whiskers etc. using orange, white and then black.
Fold the other half over and rub the top to transfer the paint, creating a mirror image.
4. Because the tempera/ craft paint dries quickly on the construction paper, use a quick rhythm of painting just a few strokes and then printing - "paint a little, print a little."
5. Try your best not to use too much paint, avoid goopy amounts of paint or else it will take a long time to dry. Alternatively, you can use your hairdryer to speed up the process to add more layers.
6. Ta-da! You did it!

Note: Children under 8 years old will need assistance drawing the outline of the tiger face.
